Sir:

This paper is offered in response to the Office Communication of May 3, 2002, in the above-referenced patent application.

Enclosed herewith are a substitute specification and substitute abstract page, plus copies of the original version of the specification and abstract with markings to show the changes made by the amendments that have already been submitted in this patent application. The text has been studied further to identify and correct the remaining items that needed correction. All are incorporated in the substitute pages and in the marked-up version as well, and all are cosmetic, relating to spelling and typographical errors and errors in translation from the original German.
